FYP WEEKLY PROGRESS REPORT

(Week: October 6 – October 12, 2025)

Project Title: " Bridging Healthcare Gaps With AI "

TEAM LEAD: Aqsa Shehzad
MEMBER 1: Sehrish Akram
MEMBER 2: Farwa Eiman Arif
MEMBER 3: Ayesha
PROJECT MANAGER: Dr. Muhammad Ilyas
PROJECT SUPERVISOR: Dr. Hafiz Muhammad Faisal Shehzad

Key Tasks Completed (This Week):

TASK	STATUS	DETAILS
Meeting with both Supervisors (Internal / External)	**Completed**	After discussion about the project proposal in the class, we decided to expand the **project scope**. Now we have added **diagnosis with AI** in it. Before, our focus was narrow, but now we are adding an AI feature for disease detection too. We also decided that the software will be in **English language** only for now as suggested by the project manager. We studied some existing models from the medical field (like **ChatDoctor)** to understand how AI is already being used in medical diagnosis and patient support.
Discussion about SRS Document	**Pending**	We had a discussion about how to make the **SRS (Software Requirement Specification)** document. Right now, we are just in the planning phase. We discussed some points like what things we will include in it. The document is not started yet; only planning is done so far.
